FDA COMPLIANCE OF RUBBER HOSES

Polimer Kauçuk San.Paz.A.S declare that Rubber Hoses ,codes shown below , observe the “Drug and Food Administration” regulations and have been produced by using approved raw materials according to 21 CFR 177.2600 for rubber articles.(Annex I)

We confirm that for all SEL food hoses the rubber material and the other ingredients used in our food grade compounds have been selected to comply with the most stringent requirements for foodstuff contact.

Both compounds and finished hose are compliant with applicable legislation:
European regulations: 1935/2004 and 2023/2006 ,
USA: FDA 21 CFR 177.2600 and the tube compound does not contain phthalate.

Rubber compound is used as hose tube material meets the FDA 21 CFR 177.2600 extraction specification for repeated use in contact with Fatty Foods.(Annex II)

We kindly inform you all rubber hoses , codes shown below , have the same tube compound recipe.

All migration tests were performed acc. to NF EN 1186 test method. EC 1935/2004 was used as reference Standard for migration tests.

If you have any further question concerning Food Hoses , please do not hesitate to contact us.

Yours sincerely,
Recep MUÇO

Object: TESTS ON RUBBER COMPOUND INTENDED FOR USE IN CONTACT WITH FOODS

Measurements were carried out on a vulcanized rubber compound marked "NBR FOOD-SEL" supplied by SEL TEKNİK KAUCUK SAN.A.S. with the above referred letter and declared manufactured according to the provisions of the Section 177.2600 of the Food and Drug Administration - Title 21.

The tests were carried out according to Food and Drug Administration - Title 21 - Section 177.2600 - Rubber articles intended for repeated use.

The results are reported in the following table.

<u>VULCANIZED RUBBER COMPOUND</u> (Sheets 2 mm thick)	<u>"NBR FOOD-SEL"</u>	<u>TITLE 21</u> <u>FDA 177.2600</u>
=====		
<u>aqueous* foods</u> (distilled water at reflux temperature)		
Total extractives during the first 7 hours of extraction	mg/in ²	1,3 max 20
Total extractives during the succeeding 2 hours of extraction	mg/in ²	0,5 max 1
<u>Fatty foods</u> (n.exane at reflux temperature)		
Total extractives during the first 7 hours of extraction	mg/in ²	12,5 max 175
Total extractives during the succeeding 2 hours of extraction	mg/in ²	1,8 max 4

Note: THE VULCANIZED RUBBER COMPOUND "NBR FOOD-SEL" MEETS THE FDA SPECIFICATIONS FOR REPEATED USE IN CONTACT WITH FOODS (MILK INCLUDED)
